

Ellamo Foundation Manifesto

We, as Ellamo Foundation, want to Contribute to a World in which we raise children compassionately. We support plans which fulfill human needs. We want Education and Entertainment to be a Celebration of Life Within the Ellamo Foundation.

We hold the child's image as follows:

The UN legal definition of the child, i.e., every human being below the age of eighteen years, should be used as an example image.

- Children are endowed with the inner potential to grow, learn, and communicate.
- The child lives his/her own life with others. The child is not an object to be pushed and modeled into shape by the adult.
- The quality of the children's relationships with adults and other children affects their growth as human beings.
- Adults represent a role model for children and need to be aware of this as children learn and copy the example of adults around them. Thus the balance between adults, especially women and men, is paramount to give the children the most beneficial image to relate to with which they will shape our shared future.
- Adults help them unfold their uniqueness.
- Children are co-creators of our world.
- Human development is a process of unfolding an individual's uniqueness in which mutually interacting biological, psychological, social, cultural, spiritual, and societal factors interplay.

The Ellamo Foundation supports and resources empowerment of Women, Men, and the Parents of children and improves - and where needed - adapts educational systems for both Children and Adults.

Sincerely yours,

Manely Ellamo
Founder of the Ellamo Foundation
